Yealink and Zoom Conference Room Solution

Yealink and Zoom have teamed up to redefine conference room video collaboration. The joint solution pairs the Yealink VC110 All-in-One Video Conferencing Endpoint with Zoom's cloud-based HD video communications software, which includes the "One-button Meeting Access" function.

Ease of Installation, Deployment and Usage

Installation

Yealink VC110's All-in-One (camera and codec) design brings an ideal form and function for videoconferencing to different-sized meeting spaces. It takes only five minutes from unpacking to uptime. For the VC110 with the Wireless Pod, it only requires 3 cable connections (PoE, DVI and HDMI).

Plug-and-Play Deployment

Yealink's Intelligent Firewall Traversal technology makes VC110 deployment a breeze by eliminating the need for complicated firewall configuration.

One-button Meeting Access

Yealink is the first and only vendor among Zoom's hardware partners to launch this function. Users can access to Zoom Service simply by pressing the "Dial" button, then they can directly input the Meeting ID to join a meeting, without going through a complex IP ADD process.
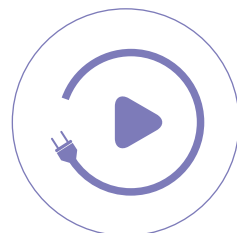

VC110-Wireless Pod
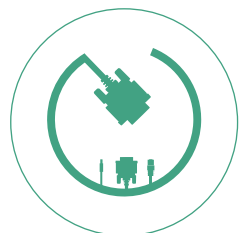

No Complicated Cabling   Easy Installation   plug and play   One-button Meeting Access

Designed for A Better User Experience

Full HD 1080P
The high-quality visual experience includes 1080P Full HD video and content sharing.

A wide-angle horizontal Field of View (FoV) ends the fear of limited meeting room space.

The dual-screen option allows for more media sharing (video, data, etc.)

REC
Call recording and screenshots can be easily done through a local USB flash drive, at no extra charge.

Embrace the Revolutionary Future of Desktop Video Collaboration

Yealink's SIP VP-T49G high definition (HD) touch screen video phone embodies the future of collaboration, as it's specially designed to optimize communication for in-demand executives and teleworkers alike. Its intuitive, aesthetically advanced design and easy to use yet rich functionality enabled the SIP VP-T49G to easily deliver one of the industry's most advanced audio and video experiences. The solution offers users the utmost in business communication and collaboration and, as such, represents an ideal endpoint choice for desktop video collaboration.

Immersive Video Experience

The SIP VP-T49G boasts an advanced HD front camera that supports 1080p resolution - the highest video quality standard for desktop phones. The solution's support for the H.264 High Profile further ensures smooth high-quality video.

Smooth and Pleasant Operations

When developing the SIP VP-T49G, Yealink kept even the smallest of details in mind for users. For example:
• The large, eight-inch touch screen boasts support for multi-touch operations, offering unbelievable ease of use.
• The full keyboard and intelligent search support simplifies user input.
• The easily manageable Control Center and Notification Center functions empower users with one-button access to frequently used functions, streamlining and accelerating day-to-day use.

Rich Media Ports for Maximizing Functionalities

• The High-Definition Multimedia Interface (HDMI) connection further extends users' video experiences.
• The solution's built-in USB2.0 port offers users multiple benefits including local HD call recording and screenshot functionalities using a USB flash drive, as well as power charging for smart phones and other devices.

HDMI

Wireless Technology for Added Convenience and Flexibility

The solution boasts a built-in Wi-Fi connection, as well as Bluetooth functionality for hands free use and phonebook synchronization between the solution and users' smartphones, adding freedom and flexibility to the office environment.
